WORK EXPERIENCE

Data Science Fellow - Defense Tech AI Team

Booz Allen Hamilton (Remote, USA)

May 2025 – July 2025

- Delivered a validated asset acquisition pricing model achieving **R² of 0.82**, by building a polynomial regression solution on a **50k+ record** dataset that identified key valuation variables to support optimal bid decisions at acquisition.

Data & Inventory Analyst

Mountain Works, Inc. (Colorado Springs, USA)

Dec 2023 – Apr 2025

- Saved **\$150k annually** and enabled a successful POS migration, by analyzing and reclassifying **500k+ records** spanning 10+ years of sales, inventory, customer, and product data using Python and Excel.
- Cut seasonal product onboarding from **5 months to 3 weeks** across **200+ brands and 3 product seasons**, by building automated Python ETL pipelines handling catalogue ingestion, pricing updates, product creation, and data quality validation.

Data Scientist

Copa Airlines (Panama City, Panama)

Oct 2022 – Jun 2023

- Improved revenue forecasting accuracy to **80%** across **84 destinations** over a **3-month horizon**, by developing and deploying a multivariate flight forecasting model in Python engineered to process **10M+** records at scale.
- Reduced manual planning effort by **85%** and saved up to **\$50k in monthly savings**, by automating 7 operational workflows across Scheduling, Network Planning, and Alliances teams using Python, SQL Server, Tableau, and Alteryx.
- Enabled proactive identification of operational risks and network optimization opportunities across **300+ daily flights in 32 countries**, by building a hub-health operational anomaly detection and risk monitoring dashboard tool using Teradata, Tableau, and Alteryx. Adopted as a core stakeholder resource in monthly CEO and VP briefings, supporting KPI tracking and executive decision making.

Data Analyst & Programmer

Logic Studio (Panama City, Panama)

Jan 2021 – Jan 2022

- Centralized **3M+ financial records** into a unified data warehouse for BI reporting, by building Azure Data Factory ETL pipelines for a top institutional bank.
- Ensured data governance and regulatory compliance for a national energy authority covering **4M+ citizens**, by building Python and SQL pipelines to clean, transform, and deliver structured reports across multiple cross-functional teams within an Agile development framework.
- Led a **32-hour** cloud and analytics course in partnership with a local university, training staff and growing programme attendance by **200%**, generating **\$18k+** in revenue.

TECHNICAL SKILLS

Programming & Data: Python (Pandas, NumPy, Pytorch), SQL, R

Machine Learning & AI: Regression, Classification, GLMs, Time Series Forecasting, Deep Learning, Unsupervised Learning, LLMs, Feature Engineering, Model Validation

Statistics & Experimentation: Hypothesis Testing, A/B Testing, Experimental Design, Bayesian Analysis

Data Engineering & Visualization: ETL Pipelines, Large-Scale Data Processing (Spark), Cloud (Azure), Tableau, Power BI

EDUCATION

Georgia Institute of Technology

Atlanta, USA

MSc Analytics (Computational Track)

Dec 2023

United States Air Force Academy

Colorado Springs, USA

BSc Computer Science

Apr 2020
